Animal Control in Hand

NEW

Stock Prod Range

Robustness, Flexibility and Choice

Stock Prod Professional (G05652/G05651)

Super tough shaft and market leading design, the Professional models are flexible and robust to absorb sudden animal movement - reducing stress to the user and the animal.

Rechargeable (SG250)

Effective, durable and rechargeable option for keeping livestock moving.

Standard (SG150)

Strong, safe instant power for use with disposable batteries.

* Length includes handle

STOCK PROD

Professional

Available in two models, Ramp Up and Full Power

Ramp Up Model (G05652)

- Unique patented ramp up power - the animal decides level of discomfort before moving away
- Decreases animal stress by minimising shock delivered - especially important for animal handling prior to slaughter.

Full Power Model (G05651)

- Standard full power functionality

SUPERIOR BATTERY LIFE

- Class leading run time on one set of batteries
- Highly efficient circuitry and 4 x large capacity D cell batteries (included)
- Battery life averages at least 2 months in typical professional usage applications.

SUPER STRONG SHAFT

- Aluminium shaft with galvanised steel spring provides unique strength and flexibility
- Shaft is robust to absorb sudden animal movement, reducing stress to the user and product
- Extra large attachment nut to overcome breakages
- 89cm shaft included with both models; 59, 89 and 119cm shafts also sold separately (G05653, G05654, G05655).*

FULLY SEALED ELECTRONICS

- Fully sealed motor assembly providing the ultimate protection against moisture
- Disassembles very easily and spare parts are readily available.

* Lengths include handle

STOCK PROD Rechargeable
